

Welcome to the first eco-friendly
Meeting Room in Bologna

Green Meeting Hall

ENVIRONMENTAL SUSTAINABILITY

The **Green Meeting Hall** includes two large **modular rooms** accommodating 39 and 36 respectively which can be configured as a single room accommodating 98. The room has been designed in accordance with the principles of environmental sustainability applied to construction materials as well as to system installations. The whole construction and cladding is made in wood, the most environmental-friendly construction material:

- Timber does not need any external power in its manufacturing process, it is “self-produced” naturally and is the only truly renewable material;
- In our construction we only use timber from PEFC or FSC certified forests – i.e. sustainably managed forests;
- Only power from renewable sources is used for heating and air conditioning.

TECHNOLOGY

All meeting rooms are particularly comfortable and equipped with next-generation multimedia systems with open Internet and state-of-the-art communication systems:

- 16:10 motorized drop-down **projector screen**;
- full HD 5000 ANSI Lumens **projector** with in-ceiling recessed, motorized lift;
- point-to-point or point-multipoint high definition **videoconferencing** devices; audio/video system which can be connected to PCs and mobile devices in AirPlay wireless mode;
- top control **simplicity and versatility** thanks to audio and video touchscreen control panel available to conference speakers in each room.
